RESEARCH INTEREST

My research focuses on algorithmic data mining, machine learning and deep learning. I actively maintain two lines of research with a strong philosophy of transferring research to significant real-world applications. First, I research on mining significant patterns from various types of large graphs that manifest different characteristics of complex real-world networks. Second, I develop novel methods to understand the black box of deep neural networks.

EDUCATION

Assistant Professor

January 2021 - Present

McMaster University, Hamilton, Canada

Research: Trustworthy AI and Large Scale Graph Analysis

Postdoctoral Fellow in Computer Science

September 2015 - November 2018

Simon Fraser University, Burnaby, Canada

Supervised by Professor Jian Pei

Research: Local Pattern Mining on Large Graphs and Interpretability of Deep Neural Networks

Ph.D. in Computer Science

September 2009 - July 2015

University of Chinese Academy of Sciences, Beijing, China

Supervised by Professor Qingming Huang

Thesis Topic: Large Scale Dense Subgraph Mining

B.Sc. in Telecommunication Engineering

September 2005 - July 2009

Huazhong University of Science and Technology, Wuhan, China

Graduated with Honors. (GPA: 89.5/100, ranked 3rd out of 266)

WORK

Principal Researcher (Leader of the AI Research Team)

November 2018 - January 2021

Huawei Technologies Canada, Co., Ltd., Burnaby, Canada

Research: Interpretability, Security and Compression of Deep Neural Networks, Large Scale Graph Pattern Mining and Privacy Preserving Federated Learning
